## **DETAILED ACTION**

### ***Inventorship***

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Said claim includes the terms "discharge end" and "receiving end" in lines 16 and 17, respectively. It appears that said terms were erroneously reversed.

Appropriate correction is required.

***Allowable Subject Matter***

Claims 1-5, 11 and 12 are allowed. Claims 7-10 are objected to but would be allowable if rewritten to overcome the rejection of claim 6 under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The Examiner considered Patent Number 3,941,235 by Pierret et al to be the prior art most closely related to the Applicant's claimed invention. Although the conveyor apparatus disclosed by said '235 patent incorporates conveyor 2 and rod 8 that read on the upstream conveyor and shield, respectively, of the Applicant's independent claims 1, 6 and 11, it fails to disclose or suggest actuation of said rod 8 as a result of a force applied via debris acting upon it.

***Conclusion***

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number 5,082,118 by Rintala et al because of its exit door 12,

Art Unit: 3653

Patent Number 4,955,484 by Rintala et al because of its exit door 12,

Patent Number 4,199,066 by Horzer et al because of its conveyor belts 6 and 9,

and

Patent Number 3,853,212 by Downes because of its conveyors 50 and 60.
